

## Pirates Treasure Hunt – Learn math in a playful way

A exciting digital board game for first graders

**Frankfurt am Main / Germany, December 01, 2020:** Burning Fox Games releases their first game app "Pirates Treasure Hunt" for first grade students. As an exciting board game, which helps to get started in mathematics.

Pirates Treasure Hunt is a game app in the style of a classic board game. Two to four players compete against each other to divide the pirate's treasure among themselves. The players throw the dice in turn, add up the dice eyes and must choose the right treasure island. The player with the most coins at the end wins. By adding up the dice and assigning the numbers to the corresponding number islands, the number range up to 10 is trained and consolidated in a playful way.

*"The inspiration for the hunt for the pirate treasure was my 6-year-old son and his entry in elementary school"* explains Nils Schergens, Founder of Burning Fox Games. *"We wanted to create a game that is both fun and helps you learn the basics of mathematics at the same time"*.

As a game app with a target group of girls and boys aged 5-7 years, the focus is on a child-friendly design. This includes, among other things, the complete absence of advertising or in-app purchases.
