## Steckpuzzle Jigsaw Puzzle – Games app for toddlers

An age suitable pastime

**Frankfurt am Main, January 19, 2021:** Burning Fox Games releases the game app "Steckpuzzle Jigsaw Puzzle " for toddlers between the ages of 2 and 4. Fun and age-appropriate content are the focus of the game app and this without advertising.

In this varied jigsaw puzzle game, children can freely choose between nine puzzle sets. Through a child-friendly handling via drag & drop, the jigsaw puzzle can be solved independently. Incorrect puzzle pieces automatically return to their starting point and if the child has solved the puzzle correctly, there is a shower of stars with background music as positive reinforcement. The next jigsaw puzzle is started automatically after a short break and is created by a random generator, so that the child always receives a new puzzle.

"Especially in the current unusual times, it happens again and again that even the smallest have to spend a short time alone." Nils Schergens, founder of Burning Fox Games, tells us. "For this, we wanted to create a game that meets the requirements of young children and also does not challenge them too much and at the same time fosters them."

The digital jigsaw puzzle game is specially designed for toddlers and trains fine motor skills. In addition, children learn to recognize different objects and distinguish their shapes. They can also get in touch with numbers and letters for the first time.
